Date of Birth: 31.08.1995

Nationality: India

Work Permit: Unrestricted (Niederlassungserlaubnis)

Profile

Senior Data & AI Engineer with 4 years designing and delivering end-to-end data platforms and production AI systems. I own the full solution lifecycle — from requirements engineering and architecture decisions to deployment and user adoption. Fluent in German and English, with a consistent track record of translating complex business problems into scalable technical solutions, often as the sole technical owner.

Professional Experience

Senior Data & AI Engineer | 07.2024 – Present

BayWa AG | Munich

Multi-Agent AI System – Sales Intelligence Platform

- Redesigned the initial ML pipeline (mentioned in **AI/ML Solution Implementation**) into a production multi-agent AI system — Apache Airflow orchestration, RAG knowledge base, specialised agents
- Improved sales targeting accuracy from 15% to 25%; system runs daily in production and is now adopted as a cross-department template

AI Infrastructure & Cloud Platform Architecture

- Built the business case and drove adoption of Databricks within the SAP Datasphere ecosystem, taking AI workloads from local scripts to a live cloud tenant

Data Platform Engineering & Migration

- Migrated 10+ reports from Qlik to SAP Analytics Cloud; redesigned underlying SAP Datasphere architecture with zero business disruption
- Designed parallel reporting architecture for ERP migration (SAP to Fab4Minds), maintaining continuous data flow across 10+ production pipelines

Internal Consulting & Cross-Functional Collaboration

- Sole technical owner across 5 departments in a business unit (Sales, Procurement, Logistics, Marketing, Management) — requirements to deployment

Data Engineer & BI Developer | 09.2022 – 06.2024

BayWa AG | Munich

BI Infrastructure — Full Build from Zero

- Built the company's entire BI infrastructure from zero — no prior tooling, team, or documentation — selecting Qlik Cloud and architecting a medallion data model as the analytical foundation
- Reverse-engineered undocumented SAP table structures across 5 departments to define data sources; designed and delivered department-specific pipelines, data products, and self-service dashboards

- Replaced month-old Excel reports with near-live dashboards (10-min refresh) — system became the daily operational decision tool across all departments and remains in production

AI/ML Solution Implementation – Sales Optimization

- Architected and co-developed an end-to-end ML solution for sales optimisation — Python predictive model, automated dashboard integration, and a live feedback loop for continuous accuracy improvement
- Ran daily in production since launch; increased order volume by 10-15%, supporting sales, inventory planning, and marketing operations

Cloud Migration & Hybrid Infrastructure

- Migrated on-premise analytics to AWS; designed hybrid deployment architecture (S3, EC2) balancing cost and accessibility across local and cloud environments
-

Data Analyst Working Student | 05.2022 – 08.2022

Hoffmann Group | Munich

Analytics & Process Improvement

- Delivered Excel, SQL, and Power BI analyses, improving team workflow efficiency through standardised data preparation processes

Reporting & Quality Assurance

- Supported ad-hoc reporting requests and implemented feedback loops to improve reporting accuracy and stakeholder satisfaction
-

Formal Education

MSc. Artificial Intelligence | 11.2025 – Present

Woolf University | Remote in Germany

BSc. Elektrotechnik und Informationstechnik | 10.2020 – 09.2022

TUM | Munich

Transitioned to data analytics to pursue technical implementation in business contexts

B.A. (Hons.) English | 07.2015 – 05.2018

Delhi University | Delhi, India

Training & Certifications

Masterschool Certificate | Data Analyst Training Course | 01.2022 – 08.2022

Google Data Analytics Certification

Skills & Knowledge

Data Engineering & Development: ETL Pipeline, Data Modeling, Qlik Data Warehouse, SAP Datasphere, Apache Airflow, Apache Spark, SQL(PostgreSQL, MySQL, MS SQL Server), Data Quality Management, Near-Real-Time Processing, Change Data Capture, CI/CD for Data Pipelines, Python, Rest APIs, Git, Automated Testing

Business Intelligence & Analytics: Qlik Sense, SAP Analytics Cloud (SAC), Power BI, Tableau, Dashboard Development, Self-Service BI, Advanced Analytics

AI & Automation: Production AI Deployment, Multi-Agent AI Systems, Retrieval-Augmented Generation (RAG), Generative AI Integration, Natural Language Processing (NLP), LangChain, LangGraph, n8n

Cloud Platforms & Infrastructure: Microsoft Azure (Data Factory, Synapse, Fabric), AWS, Databricks, Hybrid Cloud Architecture

Collaboration: Cross-Functional Stakeholder Management, Requirements Analysis, Change Management, Product Ownership

Languages: **German:** C2 (Business Fluent); **English:** C2 (Business Fluent); **Hindi:** Native Speaker
